## Ref: Drawing 6

## 232 Tunstall Road ST8 7AH Gabion Wall Design – Long Edge – Side View

Not drawn to scale – provided for further information

The gabion wall is 3 baskets high until the end nearest the front of the house at which point the wall drops to 2 baskets to avoid blocking the view to the un-excavated bank at the side of existing driveway.

Materials used:

- Welded 3mm Galfan Coated wire mesh Gabion Baskets (95% zinc 5% Aluminium) in accordance with BS EN 10244-2: 2009 (Class A).
- Gabion baskets constructed using internal windlass ties and lacing wire and fronts dressed with Helical compression springs.
- Gabion basket fill = Grade 6G 100-200mm Quarried Gabion Stone
- Foundation = MOT grade sub base stone.

Specification:
Height from ground level at 3 baskets height = 2.55M
Height from ground level at 2 baskets height = 1.57M
Overall Length = 17.22M
Visible Width = Max 0.98M
