HEATON HOUSE FARM: DORMER ROOF TO LAUNDRY

DESIGN AND ACCESS STATEMENT

Consent was recently granted (Application No. 08/02056/FUL) for the alteration and extension of the outbuildings at the above. Included within this application was the alteration of a workshop to provide a new laundry accessed from the house. The existing first floor accommodation over the kitchen and utility areas of the house comprises two guest bedrooms which are currently only accessible via an external staircase. There is an opportunity in the future to create an additional internal access to these bedrooms by the construction of a new internal staircase from the area currently accommodating the laundry. There exists a former door opening at first floor level in the gable end of the bedroom block ('The Granary ') which could be utilised as a new access point to the bedrooms.

In order to accommodate a new staircase in this location it is proposed to form a new dormer roof over the laundry. Staffordshire blue plain tiles, to match the main roof, are proposed for both the new roof and the cheeks of the dormer. A window is introduced to the west cheek to provide light to the first floor landing and to give access to the hidden valley gutter formed by the dormer.

The dormer provides not only a physical but also a visual link between the outbuildings and the main house whilst maintaining a lower profile than the main buildings; it is therefore considered to be visually acceptable.
