Advances in clay tile technology means that the Hawkins single camber range combines heritage with the most modern firing techniques combining the quality and versatility of a clay plain tile with the affordability of other materials.

Hawkins is a traditional brand with over 150 years of heritage associated with its brand, and yet it still offers market breaking perfomance thanks to an astounding 30 degrees minimum pitch capability.

Accreditation to the BES 6001 framework standard for 'Responsible Sourcing' means that projects using our clay tiles can now achieve extra credits under BREEAM and The Code for Sustainable Homes. Click here to find out more.

In addition to the current range a NEW weathered effect tile offering a reclaimed weathered finish with the benefits of a new tile has been included to the range - Fired Sienna.
