Protected Species Form

The Peak District's wildlife is a valued characteristic that is important to local people and visitors alike. One of the statutory duties of the National Park Authority is to conserve this natural heritage for future generations to enjoy. The Protected species form will both speed up the planning process for applicants and assist in wildlife conservation.

Applications for Planning and Listed Building Consent will not be registered unless 4 copies of the form are received fully completed and signed by the applicant or agent. Only 1 completed set of forms is required for applications involving both Planning and Listed Building Consent.

Please include 4 copies of the completed form with your planning application using the notes (page 2) and the flow diagram (page 3) to help you.
