Dear Sir/Madam,

Application N° SMD/2016/0243

Re the above application I wish to make the following comments.

I am concerned about the access to my property. During preliminary work being carried out on the conversion of the store at the side of the property in recent weeks, builders' vehicles were parked, on occasions, in such a way as to make leaving my property difficult, the vehicles being two vans, a small lorry, a dumper truck & a small digger.

The plans of the proposed development show it to be very extensive, which will no doubt necessitate the use of more equipment over a considerable length

of time.

If the development is approved, I would like some assurance that, during the course of the building work, every effort will be made to ensure that access to my property is not obstructed at any time.

Yours faithfully.
