New planting area to the north west area adjacent to the arena. Leave a 1 metre deep grass strip behind the existing stone wall and new fence to arena before the planting begins. This is to avoid animals leaning over and eating the trees.
Hazel (Corylus avellana) and hawthorn (Crataegus monogyna). The hazel is to be planted at 4m centres, predominantly under the existing tree canopies, and the hawthorn at 1m centres. Specimen sizes of the hazel and hawthorn trees to be planted are 60-90cm high whips.

3 metre deep planting strip on top of the South Western embankment. This would help stabilise the slope and provide continuation from T2. If horses are allowed in the field then the planting needs to be fenced. To be post and rail fence to match that around the manège. Leave a 1 metre deep grass strip behind the fence before the planting begins. This is to avoid animals leaning over and eating the trees. If there are likely to be sheep in the field sheep wire fencing needs to be nailed to the fence. Mountain Ash (Sorbus aucuparia) trees underplanted with hawthorn (Crataegus monogyna). The Mountain Ash is to be planted at 4m centres and the hawthorn at 1m centres. Plant sizes - the mountain ash trees to be half standard trees and the hawthorn trees to be planted as 60-90cm high whips.
