Submission: Objection
Comments: The land is green belt land and as such should remain so. Lithium battery sites are not known for their health benefits unlike the countryside which does have.The fire service struggles with lithium batteries when they explode in cars. Can you imagine the dangers involved if this lot explodes. The toxic fumes they give off would be horrendous for people.How are people going to get food grown if so much of the UK is going to be covered in these sites.I have also just read that 22 people died in korea after a lithium battery explosion.The further we turn away from nature the worse things are becoming for us
