Proposed Amendment

The red circle on plan indicates the position of the original old farm well which has been discovered during the early stages of the excavation works, which has now stopped. The Proposed new position of the building is 2·8m further to the west and 1m North of the approved footprint The proposed position would take the well from within the footprint of the enclosed part of the building and away from the feeding doors of the building which would allow full use of the well (I did take a test sample of the water and it is safe for use.)
