Submission: Neither
Comments: The property and garden of 147 Park Lane is adjacent to a plot of land with approved planning for a single dwelling,on clearing the over growth on the land we have noticed a white pipe sticking through the side of the fence on to the land, I have also witnessed that the water from the pool being pumped out through this pipe on to the land this is unexceptable,therefore an alternative of disposing of the pool water will have to be made . There is our woodland with tree preservation at the rear of the swimming pool so no water can be deposited there either.
