Comments: The Gentleman of the House Mr Livingstone is severely disabled due to an accident in which severe brain damage was caused. He is unable to walk to the public car park in the next street a lot of the time and especially in winter as his balance has been affected. The garden is also very uneven with broken slabs, and messy due to lack of maintenance as the other owner of the property is also a pensioner and unable to keep on top of it. either side has a drive and somewhere to park and are both able bodied. I see no reason to reject these plans as the plans proposed will have a positive impact and make the property look better.

Burnett, James

Comments: Just to add to my previous comments, The front wall is not part of the listed status as it was built 1980s sometime, the 2 side walls are, but they are remaining.
