Dear Sirs

I would like to object to this proposed planning application on the grounds that Akesmores Lane is a narrow lane and therefore unsuitable for the size of vehicles that would be required to transport circus equipment. Presumably there would have to be someone living on the site to ensure security this could result in a further application being made to change it into a travellers site. I also feel that the people living near the site could be subject to vehicle movement during anti-social hours. The thatched cottage near the site must be one of historical value – if not a listed building and therefore I feel a circus storage site is completely inappropriate and ask that the planning committee reject this application.

Yours faithfully

Mrs B M Webb
