To whom it may concern

My name is Ian Wilson and I live at number 30 Warrington Drive, Leek. Although my opposite neighbour Mr. Stevenson at number 29 has not had the courtesy to inform any of his neighbours about his building plans, and there also has been no notification from the council. However, I am led to believe that he has re-submitted further plans for a single (compared with previously double) side extension to his property. This would cause great inconvenience to number 27 and was one of the reasons why the first plans were refused in the first place. It would mean there would be no access to the back of his property, therefore, where would his bins be placed. I personally would not be wishing to view rubbish bins from my front windows, if placed at the front.

However, my main objection is, I understand that he has ticked there is no problem with parking. What a laugh. Most week-ends we have to put up with not only his security service van (parked opposite my house every night, thus making it not so easy to reverse out of my drive) but also his 2 sons cars and his girlfriend's car. Thus making it 5. (every night there are usually at least 3) It would make more sense if he dug out the front of his property, like so well achieved at number 25, to make access to further parking and thus relieving the neighbours of limited access to their property and keeping parked cars off the pavements.

To get all he requires from his proposed side extension has Mr Stevenson considered plans at the back of his property, so gaining his additional kitchen space and a back conservatory which could be utilised as a study. This would not interfere with any of his neighbours and would solve a lot of his problems.

Hoping that I may be informed of any outcome of future developments.
