Submission: Objection
Comments: I am the owner of number 49 the neighbouring property of the applicant

I object to this application as number 51 have already commenced construction on a large scale rear development which shows on the current plan as a conservatory but is actually looks like a 2 storey solid brick construction

They have fenced off the site for construction by building a 6-7 ft high concrete post and gravel board type fence which has been constructed partially on my land and also on publicly shared and owned highway

I estimate that the applicant has taken between 7-10 feet of my front lawn and jointly owned public highway
