Submission: Objection
Comments: My concerns are about the passage of traffic along Sandy Lane between Job's Pool and the junction with Hough Hill. The road is single track for the majority of its length. Over the years it has become increasingly difficult to negotiate, with more vehicular use necessitating much stopping and reversing when meeting oncoming traffic, often including multiple vehicles and frayed tempers. The proposed road widening would only partly address the issue and the addition of several extra vehicles using the road several times a day would only exacerbate the situation.
