Submission: Support
Comments: We support this development in this area for several of the following reasons

1) I believe that this site was was originally passed for three linked detached dwellings and therefore planning should not be required as the building of the two detached properties has already commenced and therefore not classed as "infil "

2) the foxt community has not had any additional buildings passed for sometime and therefore this originally planned dwelling will not hinder the roads / businesses /schools etc ..

3) as a support of local businesses any additional residents in this relatively small community will support the public house and restaurant
