Ref Application N° SMD/2015/0814.

Dear Sirs/Ms, I am writing with concerns regarding the above application.

That stretch of roadway which is only matter of 700 metres from the "already dangerous" crossroads always has a severe amount of queuing traffic awaiting the traffic lights. if you can imagine cars (potentially 14) at some time waiting to turn right into this development if travelling towards Congleton, would severely hold up flow traffic both directions. The other concern is that this area on or around the roadabout will be more congested with traffic from the proposed retirement home being built on the former Meadows School site. There will be major grid locking of the roadway due to ingress and egress of traffic from the above 7 house development, the whole plan is ludicrous for a site size of this.

The other major concern is that i have now seen 2 N° public notices displayed around the existing home entrance for them to be removed within 1 day (by who ??? guess who) hence denying the public to see such notice! therefore can a more permanent type notice be attached to the fence and the applicants warned concerned the removal of such! The notice period being restarted from the new display date!

Regards

A. Allcock
