DESIGN AND ACCESS STATEMENT

PROPOSAL : Erection of three dwelling (outline)
ADDRESS : land adj. Methodist Church, Leek Road, Wetley Rocks
APPLICANT : D Weston
DATE : October 2008 JOB No. : 1156

08/01785/FUL

DESIGN

ASSESSMENT

Assessment Area

The site is an isolated area of vacant land within the settlement boundary of Wetley Rocks with a large frontage onto Leek Road. Other than the Methodist Church to the south west of the site, the application is located in a predominantly residential area. Land to the rear of the site is agricultural. Given that the nature of the proposal is residential, it is considered that the Assessment Area should be informed by the character of dwellings near the site.

Physical

The application site is currently vacant. Its front boundary is a natural stone wall. The style and age of housing in the area is mixed. There is a small number of modest 18th/19th Century stone cottages in the village; some of the more recent developments comprise detached brick houses. Recent developments are usually large within generous plots.

Planning Policy

The Development Plan for the area consists of the saved policies of the Staffordshire and Stoke On Trent Structure Plan and the Staffordshire Moorlands Local Plan. Policies relevant to this proposal are contained in the local plan. The Local Plan places the site in the development boundary of Wetley Rocks. Policy H4 states that new housing development will be expected to locate within settlement boundaries where it can be serviced and where it is sympathy with the area.

PPS1 Delivering Sustainable Development sets out the Governments strategy for the provision of new development in sustainable locations. The village has a local general store as part of the petrol filling station. A bus service is available to the nearby market towns of Leek and Cheadle.

PPS3 Housing requires that when Local Planning Authorities determine planning applications for housing they should have regard to its policies as material considerations (paragraph 68). It states that LPA's are responsible for delivering both the right quantity of housing to meet demands and needs in its area, and the right quality and mix for its communities. Para 25 states that one of the Government's key objectives is to provide a variety of high quality market housing and includes the managed replacement of existing housing where appropriate. Para. 36 states that housing should be developed in suitable locations which offer access to local jobs, key community facilities and infrastructure.

Secure By Design

The layout of the proposal and the detailing of the proposed dwelling are capable of satisfying secure by design principles.

INVOLVEMENT

The application has been prepared following consideration of the reasons for refusal of planning application 08/01019/OUT. That application proposed a single dwelling on the site and was refused planning permission for reasons relating to concerns about its low density. The current application proposes three dwellings on the site. The application is also informed

by contact with the County regarding highway safety. This has concluded that measured traffic speeds near the site, and the visibility that is available at the proposed site access are unlikely to present a highway danger.

EVALUATION

The site lies in an area where the principle of housing development is supported by planning policy. The size of the site is considered appropriate for a development of three dwellings, taking into account the shape of the site, the pattern and density of housing nearby, and densities recommended in PPS3.

There is a mixture of house layouts in the village, some have gables fronting the road, and some have front elevations fronting the road. The proposed layout provides both arrangements. In addition the layout provides an open area between the proposed detached house and the proposed semi's to give views of the open country beyond the site.

The position of the proposed dwellings and their relationship with existing houses satisfies the Space about Dwellings standards at Appendix 3 of the Local Plan. The distance between the gable end of the proposed semi's and the front elevation of the former stores on the opposite side of the road at 14m complies with Appendix 3. The average length and the size of rear gardens of the proposed dwellings also accords with Appendix 3.

The design of the proposed dwellings is a reserved matter and will need to reflect the character of development in the area.

The site access will be provided with visibility splays.

DESIGN

Use

The application proposes a residential use by the erection of dwellings.

Amount

The proposal is for the erection of a three detached dwellings. This equates to a site density of 25 dwellings/hectare. Whilst this is below Government guidance on urban densities, it is largely driven by the need to deliver a development that contributes to the character of the area and is inkeeping with densities in the area.

Layout

In accordance with paragraph 52 of Circular 01/06 the application drawings show an indicative layout. It also illustrates an indicative access point.

Scale

The application proposes buildings having the following scale parameters:-

Detached house:	Height:	Maximum 9.5m;	Minimum 8m
	Width:	Maximum 15m;	Minimum 9m
	Depth:	Maximum 8.5m;	Minimum 8m
Semi's:	Height:	Maximum 9.5m;	Minimum 8m
	Width:	Maximum 8.5m;	Minimum 7.5m
	Depth:	Maximum 8.5m;	Minimum 8m

Landscaping

Given the nature of the site and then proposed layout, landscaping can be provided within the site.

Appearance

Proposed materials is a reserved matter. However it is likely the walls will be brick with the roof likely to be plain tiles.

ACCESS

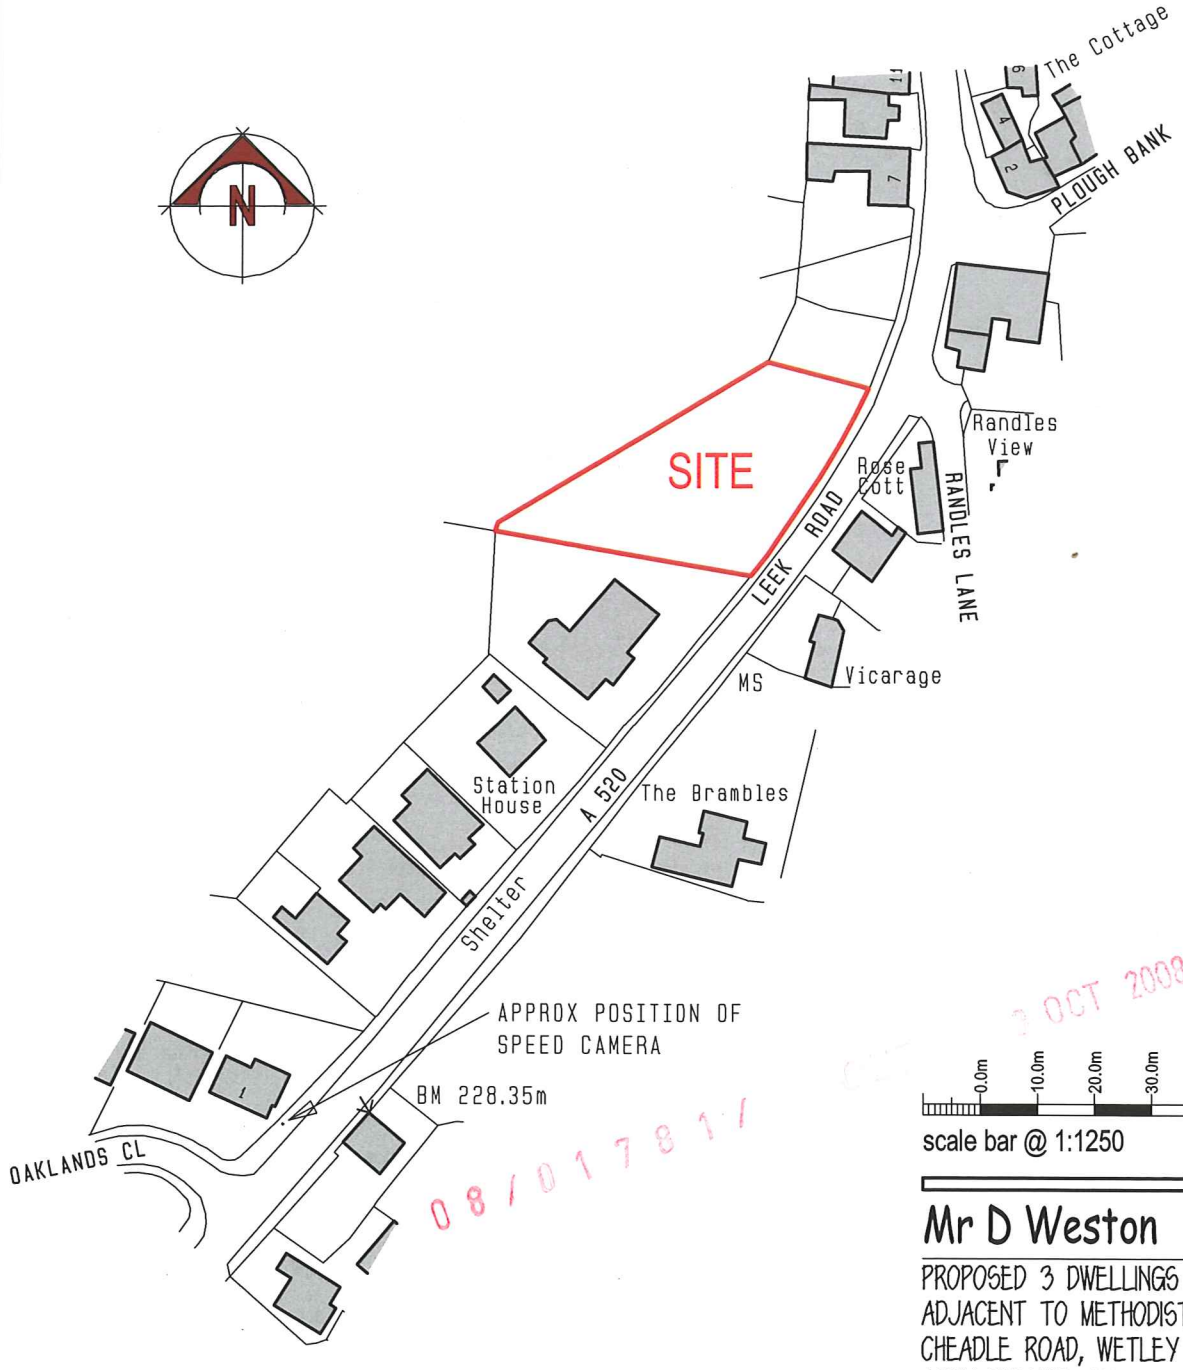

VEHICULAR AND TRANSPORT LINKS

The proposal includes consideration of a single site access. The position of the access has been located to provide maximum highway visibility and follows pre application discussions

with the Highway Authority. The front boundary wall is proposed to be lowered to achieve visibility. The site includes vehicular turning facilities.
The site is located on a major bus route providing access to Leek Bus Station, Cheadle and the Potteries.

INCLUSIVE ACCESS

The development provides for occupation by less abled people through compliance with Part M of the Building Regulations by the provision of level accesses to the principal entrances to the proposed houses, and provides internal arrangements, such as the width of corridors and doorways, that are suitable for less able access.
