Re. Application number SMD/2020/0199 Mr. Bullivant

We wish to object categorically to the above planning application.

Our property has a very small rear yard and the proposed 2nd storey extention of over 20 feet high would be just a few feet from our boundary. Therefore this would cause an immense and unacceptable loss of light. Many properties would have their privacy compromised because of the overlooking windows.

With these points in mind, when you come to make your final decision we ask that you consider the Grove St. residents who would suffer from the impact of such a large construction in such close proximity.

We are aware that these plans were turned down previously and we urge you most strongly to refuse this application once more.

Yours faithfully

[redacted]

Mr & Mrs G Salter
