DESIGN AND ACCESS STATEMENT
Proposed Covered Multi-Functional Building
Located at "Touchwood", Blythe Bridge Road,
Caverswall, Stoke on Trent

08/01808/
14 OCT 2008 - SMD

The proposal is for a single steel framed building for mixed uses, including horse-box parking, located to the northern end of the existing stable buildings at the above site.

Physical context:
The site is on land extending to 1.24 Hectares centred at Touchwood, Blythe Bridge Road, Caverswall, Staffs in total, of which approximately 1300m2 comprises the domestic curtilage. Touchwood is a formal smallholding, whose holding number is CPH2720122.

The site is well served by an existing access from the adopted highway, via the existing track running along the northern boundary of the application site.

The proposed building will be sited immediately alongside the northern gable of the existing stable buildings, and will occupy the area of land which is currently used as informal parking for the applicants horse-box. The building will measure 10.8m long x 4.2m wide, and will be used for the storage of various feedstuffs and bedding for use in connection with the equine uses at the site, and also for covered parking for a single horsebox.

The building will extend to a height of approximately 4.4m, and will be clad to two sides, and the roof in a brown coloured cladding material, so as to ensure the development will be unobtrusive in the locality.

Social context:
The application will offer very limited social benefit, other than providing an undercover area for the storage of feedstuffs, bedding and the existing vehicle as highlighted above.

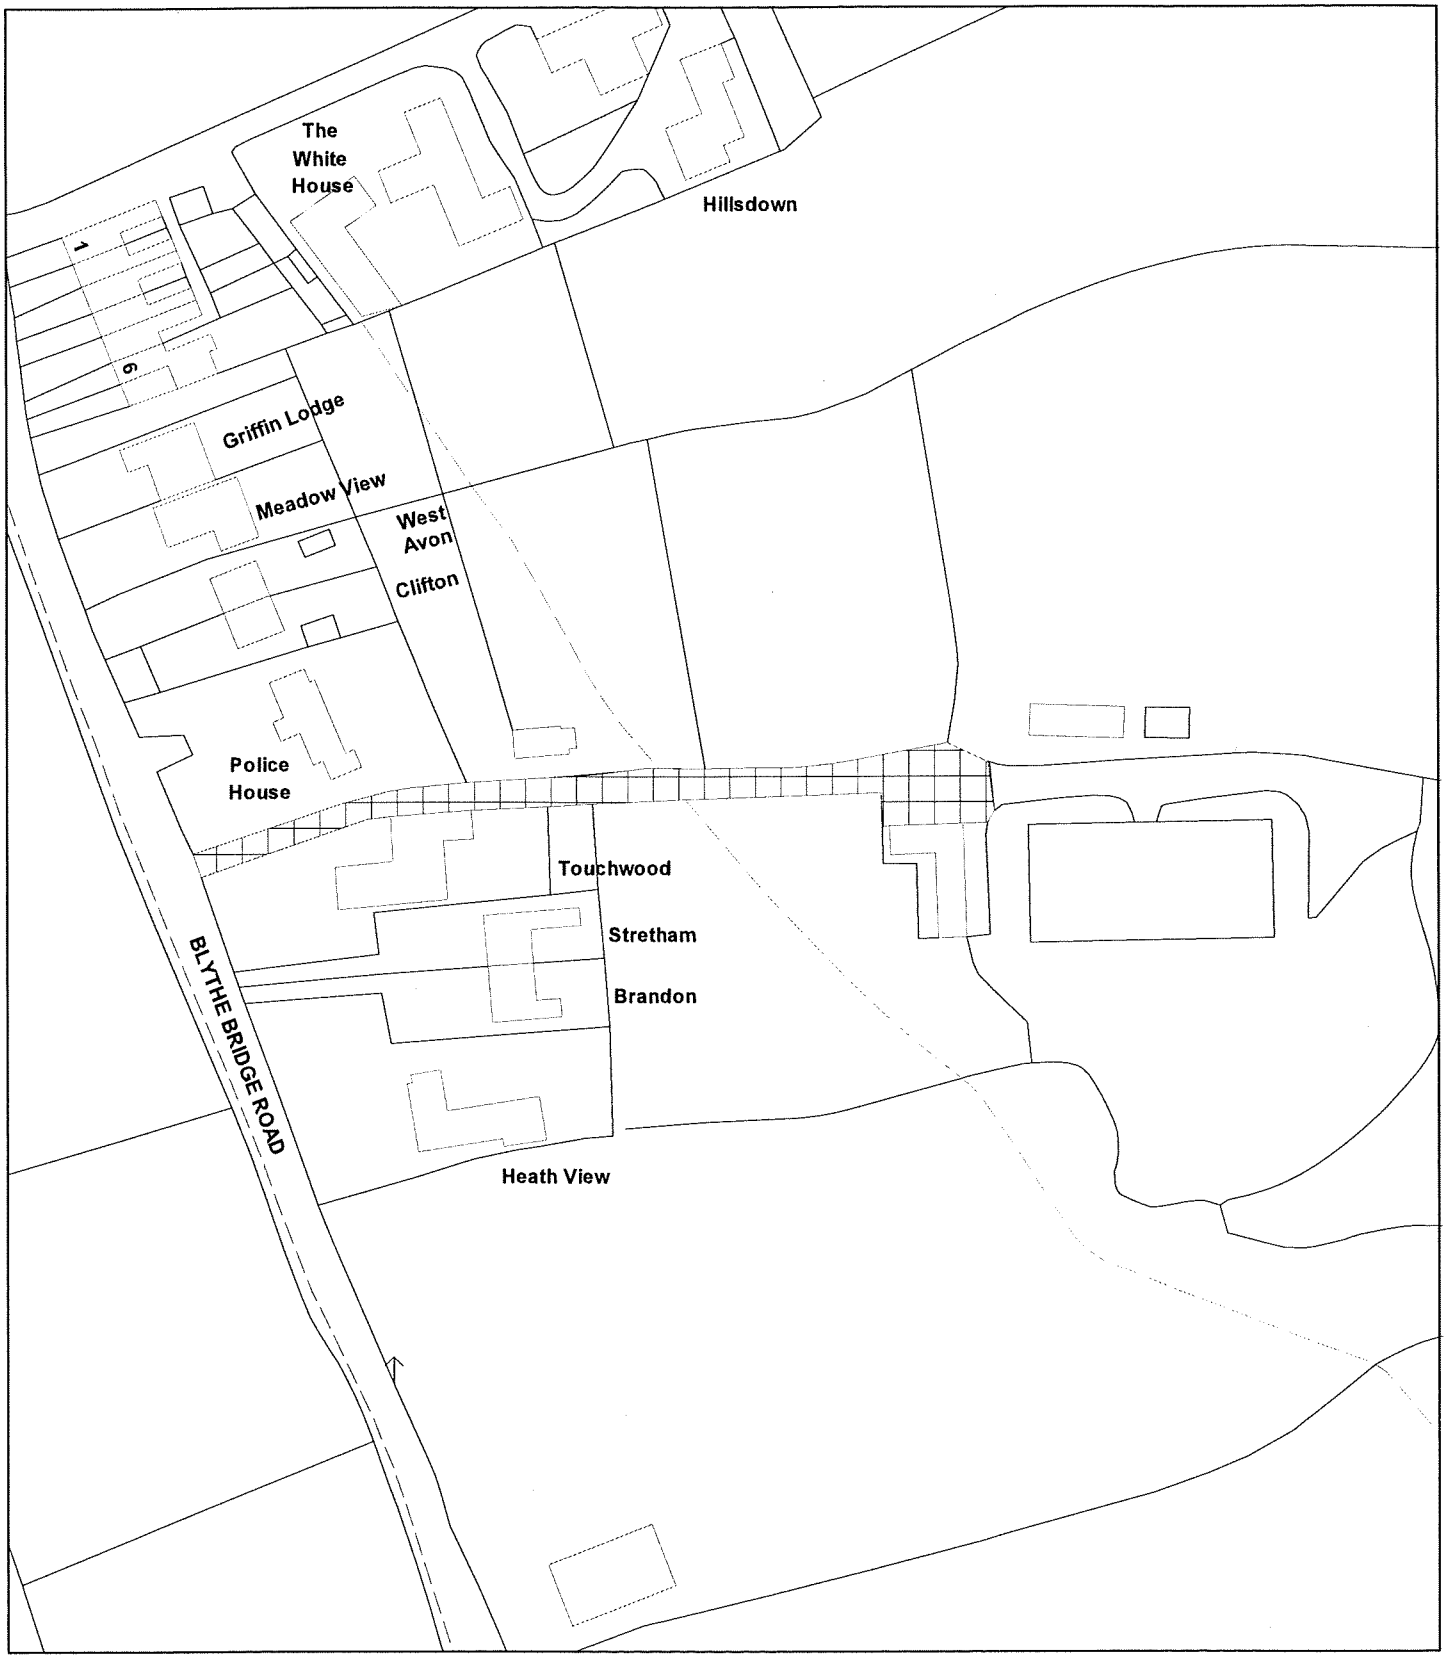

Economic context:
The application provides limited, albeit significant economic benefit. The proposed building will facilitate the dry storage of equine feeds and bedding, which currently can only be purchased in relatively small quantities due to limitations of existing storage capacity. By utilising the proposed building for such storage, the applicant will be able to benefit financially due to being able to purchase not only larger quantities of feed/bedding, but also (especially in terms of bedding) larger bales, which are inherently cheaper to purchase than a comparable quantity of traditional smaller bales.

Wildlife Assessment:
There is no existing wildlife nesting in the work area, as the areas is regularly subjected to trafficking in the movement of the applicants horse-box. As such, no protected species or other wildlife, flora or fauna, would be adversely affected by the provision of this much needed facility.

Vehicular/pedestrian access:
The site will be accessed via the existing metalled track running from the adopted highway, to the rear of the existing stable buildings. The proposals do not seek to – nor is it necessary to – make any alterations to the existing access arrangements.

Summary:
The proposals make a sensible use of an area of the subject site which will allow the applicants to form a modest scale storage building.
The application provides suitable accommodation, and will comply with the aspirations of local and national planning policy.
