PLANNING STATEMENT IN SUPPORT OF A PLANNING APPLICATION FOR PERMISSION TO ERECT AN EXTENDED CATTLE (CUBICLE) SHED AND REPLACEMENT SLURRY TANK AT **LONGSHAW FARM** BRADNOP STAFFORDSHIRE ST13 7NJ

The proposal relates to a large dairy farm

Stocking at the mostly self contained farm holding extends to some 350 milking cows and their progeny over 430 acres (172ha) with all forage found

The proposal is to erect a new building as an extension to an existing cubicle shed so that the cattle thus housed can be accommodated to an enhanced welfare standard

The proposal also includes the replacement of an slurry tank with a slurry only bio digester tank. This comprises a circular tank, similar to that which is to be replaced. The digester will generate an average 30kw output (max.80kw) which will suffice for the farm's operational need and provide a renewable energy input into the National Grid.
