Agricultural Developments Statement

Agricultural Holding No. 37/053/0016

Size of holding

The applicant currently farms approximately 70 acres. This acreage is owned by the applicant. This figure includes existing agricultural buildings and yard area.

This farmland is used to rear cattle and sheep and to produce fodder.

Animals kept at the site

The applicant currently farms approximately 12 head of cattle including followers and 40 head of sheep.

Existing buildings on the holding

The existing agricultural buildings at Lark Park Farm are used to house cattle and sheep and to store fodder and implements required to manage the holding.

There is not sufficient enough room in the existing buildings to house the ever increasing stock levels and to store the fodder and implements required to manage the holding. The applicant is fully aware of the inadequate housing and storage facilities available.

Additional rented buildings/land

The applicant does not currently rent any additional buildings or land.

Proposed size of building

The applicant wishes to erect a steel framed agricultural building 18.288m long x 14.326m wide (comprising 1 No. 10.668m wide apex building and 1 No. 3.658m wide lean to building) x 4.572m high to eaves level.

The floor area created by this development will be 261.99m².

Proposed use of building

As a result of the applicants expanding business they require this building to house and feed cattle and to house and lamb sheep. These livestock will be loose housed on a solid floor. This building will also be used to store fodder and implements.

This building will accommodate the required stocking densities and ventilation and also allow for a well-drained, dry lying area. All animals will have access to an adequate supply of clean drinking water at all times. This building will ensure good farm/stock management with easily maintained clean and hygienic conditions. This building will ensure a good strong future for their business.

Defra regulations state that animals are not meant to poach the ground therefore housing for animals is essential.

The Welfare of Farmed Animals (England) Regulations 2000 (S.I. 2000 No. 1870) Schedule 1, paragraph 13, states that:

 air circulation, dust levels, temperature, relative humidity and gas concentrations shall be kept within limits which are not harmful to the animal

All new buildings should be designed with the animals' comfort in mind, and with the aim of preventing respiratory diseases. The buildings should provide enough ventilation throughout the year for the type, size and number of stock to be housed in them.

FABBL requirements state that the space allowance for loose-housed cattle on a solid floor is a minimum of 3.0m² for 200kg cattle, 3.4m² for 300kg cattle, 3.8m² for 400kg cattle, 4.2m² for 500kg cattle, 4.6m² for 600kg cattle and 5.0m² for 700kg cattle.

FABBL requirements state that the space allowance for loose-housed sheep on a solid floor during pregnancy is a minimum of 1.2m² - 1.4m² and 2.0m² - 2.2m² after lambing with lambs at foot up to six weeks of age.

Shelter should be provided for sheep especially in cold, wet, windy weather, at lambing and after shearing. Very young lambs are particularly susceptible to hypothermia in cold wet weather.

Deep litter bedding will be used on the solid floor; this bedding will then be spread back on the applicants land.

This building will also be used to store Heston bales of straw. By enabling these bales to be stored in the building it will reduce the use of plastics therefore creating a more environmentally friendly holding.

This building will also be used to store implements in which are currently left outside exposed to the elements. This building will also enable the applicant to have shelter to mend any broken down implements. Implements to be stored include tractors, trailers and general agricultural equipment required to run the holding. This building will enable the equipment to be kept out of view and restricts the chances of the implements being stolen.

There is not sufficient enough room in this existing building to house the stock levels and to store the fodder and implements required to manage the holding. The applicant is fully aware of the inadequate housing and storage facilities available.

Employment at the site

The applicant currently runs the holding himself and does not employ anyone on the holding.

Landscaping Details

The applicant is happy to carry out any landscaping scheme specified by yourselves in order to protect the amenities of the site and the area.

Any trees planted will be fenced from livestock and will be protected by either spiral-type rabbit guards with canes or Netlon mesh-type guards including canes.

A circle of 1 metre around the base of each tree shall be kept weed free for a period of at least 2 years.

Any trees that die, become seriously damaged or diseased will be replaced by trees of similar size, unless there is reason to believe that the original species chosen was unsuitable for the site, in which case an alternative appropriate species will be used.

All planting would be carried out in the first planting season following the construction of the building.

Trees will be provided in accordance with BS 3936 and planting to be in accordance with BS 4428.
