17 wall field close

tean

st104jr

1/ Wallfield close is designated OPEN PLAN!

2/ Number 18 wall field shouldn't have a fence which in reality is a wall in the first place.to BE extended

3/ NO businesses are supposed to operate from wallfield close though it is well on the way to becoming a trading estate.

4/ Due to the numerous vans that are at the end of the road (wallfield close) .SMDC refuse trucks cannot turn around without mounting the pavements .

5/ They mainly operate in this road by either reversing all the way down or by driving down and reversing up , as this section of road has a sharp nearly

90 degree bend the driver is for the most part unsighted .

6/ If this wall is extended the SMDC bin drivers will be completely unsighted to pedestrians who have to use the road as the pavements are

blocked due to vehicles parked on the footpath and other road users.

7/ It is only good fortune there has not been a serious incident so far.
