Ref to S.M.D. 2016/0288 planning.

Dear Planning officers,

I do strongly object to this plan, the area that the waggons will pass by the side of the sheds, on the farm, are only about the width of the lorries + one side is a brook, which is the start of the River Blyth, so pollution would escape into the brook, coming up the farm drive they would pass very close to the house at the top, & they would not be able to turn LEFT as they would knock down the wall belonging to the house, the roads around are not wide enough for these 30 ton waggons it is only a country road, years ago it was a quiet road, but now is as busy as the M6, because,

traffice from Bucknall, Worrington etc use this as a thro road to A520 Leek to Stone, so it is VERY busy. On March 22nd, this year, a HGV lorry, 3deck with sheep, came thro this road, using it as a cut thro, I counted at least 15 cars following it, it wanted to turn into Clough lane, but couldn't, so it had to shunt back, + shunt back, in order to turn, into clough lane

I do know this area very well as I lived at Barkhouse Farm, for 60yrs plus, there is a lot of issues about this, I don't believe it when the applicant says that there is no where else for 10 miles I can think of plenty for them, I could write a lot more about this, but don't want to bore you to much,

I would like that if possible any of the planners have the time to come to my house + wait to see how much traffic goes past.

Thanking you,

Yours sincerely
