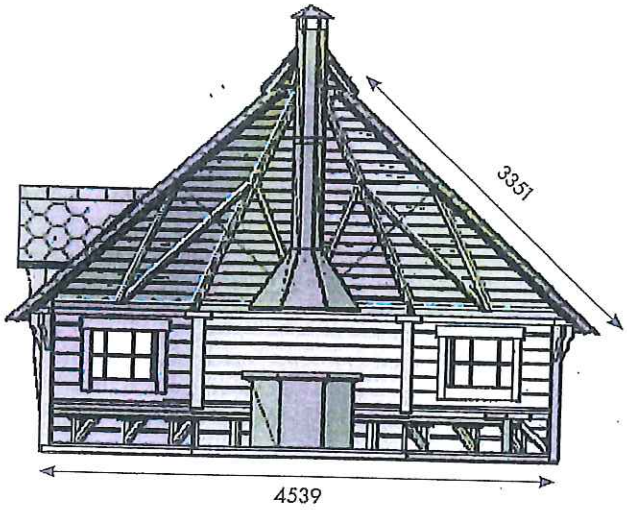
Specification APPENDIX 1 P.T.O

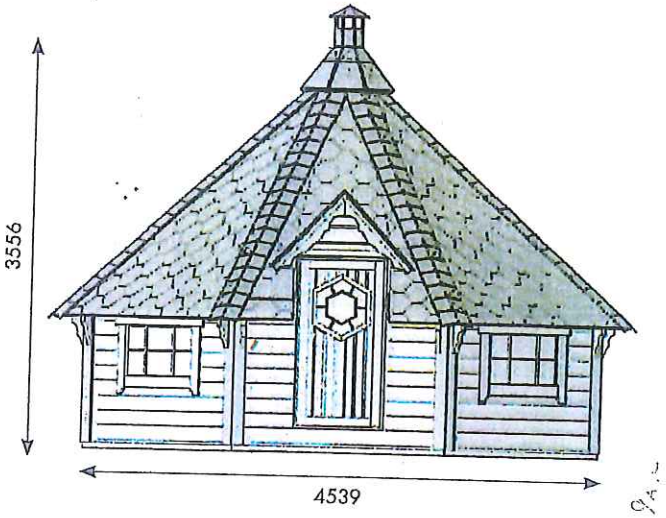
Inside area (m²)	16.5 + 16 FOR BATHROOM + BEDROOM = 32.5m²
Shape	8 corners
External dimensions (WxD, mm)	[redacted] 6551 X 6551
Number of windows	#6
Number of opening windows	2
Size of windows (mm)	880x510
Size of doors (mm)	780x1500
Weight (kg)	1800
Number of benches	7
Number of sleeping benches	2

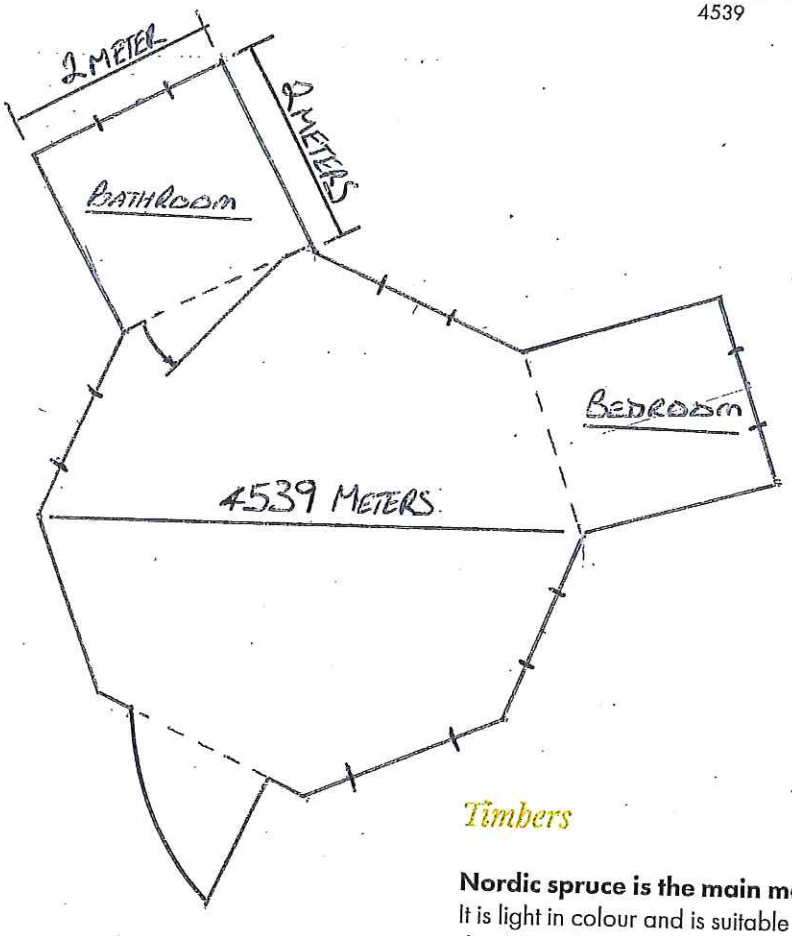
Six layer bitumen tiles consist of a durable and highly resistant fibre glass base coated with a polymer-reinforced bitumen mix made of high quality bitumen and aggregate.

The top layer of tiles are surfaced with mineral granules that lend colour to the tiles and ensure high UV- protection and weather resistance.

The bottom layer of tiles are coated with adhesive polymer-reinforced bitumen, protected with a silicon membrane. As a result of sun heat exposure, the overlapped tiles stick to each other and form a double hydro-insulating layer, which guarantees excellent leak resistance. Bitumen tiles can be used both for new construction and roof repair work.







Timbers

Nordic spruce is the main material used for our cabins. It is light in colour and is suitable for painting, and is a highly durable timber.
