Photinia 'Red Robin'

Upper Fernyhill
Farm

Field

PROPOSED LANDSCAPING

It is proposed that a complimentary mixture of shrub planting be used within the south-east corner of the existing patio outer-wall.
This additional planting of indigenous species will help screen the existing patio elevation and soften the transition between residential curtilage (boarded timber fence) + open field.

These plant species will include;
- Hawthorn
- Blackthorn
- Hazel
- Elder
- Geulder Rose
- Field/Dog Rose

(Photinia 'Red Robin' to be used on the south elevation of the patio outer-wall to fill the gap in the existing planting)
