Activ-track

High quality waxed surface for professional yards, riding schools and owner-riders

Activ-track was developed in 2005, originally for smaller professional yards and 'owner-riders', and it has been a tremendous success. Having proved itself invaluable in a wide variety of applications it is used at BSJA establishments, competition venues, canter tracks and gallops, RDA centres, large livery yards, riding schools, elite dressage yards and small indoor schools. ACTIV-TRACK contains our unique stabilising CLOPF® Fibre, which provides exceptional stability and energy return. In addition, due to its superior coverage, by choosing ACTIV-TRACK you may need up to 15% less tonnage when compared with other products, which may also mean a reduction in delivery costs.

Benefits of Activ-track

- Accurately manufactured by weight
- No irrigation system required
- Dust free
- Ready to use immediately following installation
- Cushioning effect thus sympathetic to the horse
- Provides secure footing for the horse – they perform to the best of their ability
