Submission: Objection
Comments: I have already emailed objecting to this application but this seems to be dragging on and on now so once more I would like to put forward my strongest objection to this application to put a development of a dwelling on the land suggested. There are many empty or for sale properties in Biddulph and to build another seems ridiculous. Also in terms of its location this is idoiotic and once again just seems to be the owner of the land desperation to make money rather than consider anybody directly affected by there drive for cash. Mine and 4/5 other properties would be directly affected by any development in this location. Not only by access/privacy and security but also having a pointless property like this put in this location I am sure would only, in my opinion have a negative effect on the value of any adjoining properties including mine. I am disgusted that the land owner should apply for this development in this location and can assure anybody still considering this application that if this was accepted it would cause considerable stress and unhappiness in our household.
