Submission: Objection
Comments: Wish to object to this application. The parking situation makes it unworkable. The area is already beyond capacity and not able to take any more vehicles from additional flats being approved.

The main car park is already full during the day and the car park across the road is only temporary. There is already additional accommodation due at Millwall Hall, which is going to cause more issues for residents parking. You have also got the co-op/Napoli restaurant and Post Office which already see vehicles parked on the pavement causing a safety issue.

Residents are already driving round the area to find somewhere to park in the day time, and end up parking 5 / 10 mins away, in other area¿s that residents have problems parking.

It¿s ok to say there is a car park nearby, but when this is full, which it is 7 days a week. That is NOT the answer.

If this did go ahead then resident parking is a MUST. And a serious consideration needs to be made for parking.
