Minor works on shop frontage are a modern art masterpiece and grotesque.

No doubt the pro-business SMDC are ecstatic at what they see, a breeze blocked up doorway with two large advertising boards that would complement a 1980s arcade game.

The dignified tax paying residents who live in the streets close by, well as usual our thoughts are right at the bottom of the pecking order.

Along with other business in the vicinity that work in the night time economy ,the 1980s arcade feel and little neon light of this shop front appeals to youngsters who congregate in the area and engage in intimidating and unwelcome behaviour. Some times it can expand to anti social behaviour causing damage and distress.

I know along with the ATM just recently approved close by, I will be told its a tough decision that I will have to accept. Of course common sense does not deduce the increase of the anti social behaviour cannot be linked to a night time economy and shop fronts that are a modern art masterpiece.

So come on then get it approved, you are fine it is not on your doorstep is it, lets watch the barbarians run this village into the ground with a loss of all moral and civic pride with its increase of intensification of use.

Local shops for the needs of local residents within walking distance!

Regards

Paul
