Dear Planner,

Cherry Barn, Cherry Lane, Cheadle, ST10 4QS - Proposed electricity generator plant.
Planning Portal ref: PP- 05054740

TREE REPORT

The application was submitted on 2nd September with the tree report to follow. This letter contains the relevant information.

The trees in question and the subject of this report are a row of mature individual hawthorn trees (*Crataegus spp.)* located on the site boundary to the immediate east of the application site.

The trees have been laid in the past and as a result contain up to 16 stems or so when the trees are measured at a height of 1.5 metres from the ground. This makes the calculation of Root Protection Area for the trees difficult to calculate.

I have discussed the matter with Mr Steve Massey, the Council's Tree Officer, and have agreed that the nearest point of the development – the eastern proposed 3m high acoustic fence - should be 6 metres from the boundary line. This 6 metre strip would contain a 5 metre Root Protection Area and 1 metre "working area" to enable the fence to be erected.

Kind Regards,

K. Wainman

Ken Wainman.
