REC'D 31 OCT 2018

Dear Sir.

Re Planning of Agriculture Shed

This Shed is obtrusive to the property 'Rock Villa'

The Shed was erected and on finishing a water Pipe and supply was installed and gates fitted - and water trough.

Animals in the Shed from Oct '17 / March '18 approx these animals purchased are about 6/8 months old mooing out most of the night causing sheep depravation for owners of 'Rock Villa'.

Animals housed in this Shed away from Mr & Mrs Keelings house are not causing them any noise.

Cleaning out of the shed is by Tractor / Spreader handed / Robot, feeding and cleaning at times late at night lights shinning on 'Rock Villa' property and noise from farm equipment and also at times the Tractor / Spreader driven by the farmer to the Shed and left facing over my property while cleaning out the Tractor has been left running, while the Robot equipment has been used in the Shed by the farmer (Mr Keeling)

The screening is inadequate for the Shed Mr & Mrs Keeling cutting and pruning branches of the trees.

If you wish to visit my property at any time feel free to do so

Thanking you

[redacted]

Mr Keeling goes out to work
