Dear Sir,

With reference to above proposed plans, as plans will affect our immediate locale, we have felt it necessary to bring to your attention the close proximity to our shared boundary. The extension will involve bi folding doors which will look directly onto our rear door and outside sitting area. At present we are screened by a conifer hedge which if removed would mean we would have no privacy; especially as the property involved is in an elevated position.

Whilst we have no objection to the proposed development we are concerned re the threat to our privacy the nearness to our boundary could cause.

Could this please be considered by the planning Comittee?

Yours sincerely
