Project:	**St. Marys RCS, Leek**
Title:	**Proposed Fencing Works**
Date:	**November 2016**
Project ID:	**3072-13**

Context

The proposal is to improve security fencing around the School site.

The school is a collection of single storey built blocks, some with felt flat roofs and some with pitched tile roofs. The school is located on the junction of Cruso Street and Broad Street and generally has no significant architectural features.

The proposal is for new fencing along the perimeter of the school grounds

Amount

The proposed fencing is for the entirety of the boundary to Broad Street and continuing around the corner onto Cruso Street. There will also be new fencing to the boundary on the passageway to Geoffrey Avenue.

Layout

The layout of the existing buildings are unaffected.

Scale

The proposal will not affect the general scale of the existing building.

Appearance

All fencing will be blue powder coated mesh fencing to match.

Landscaping

There is no change to the existing bio diversity of the site.

Access

The proposed fencing will not affect access to the site.

The existing School building has full access for the disabled.
