Submission: Objection
Comments: I have no objection to the plan providing

a. that the fence is sited either exactly on the existing boundary line or on the school side of it; I do not want the fence to encroach on to my land as the last fence Churnet View erected encroached on to the public footpath.

b. that the present fence, which is in a ruinous state, is removed entirely. If left on site it is a potential hazard to my animals and to anyone working nearby.
