Local Requirements

Proposal: Agricultural building to house livestock & to store fodder & implements
Site Reference: Mr J Stonier, Land to the East of Leek Road, Wetley Rocks, ST9 0AX

Affordable Housing Information
Not Applicable

Agricultural Developments Statement
Agricultural Holding No.
37/023/0234

Size of holding
The applicant currently farms approximately 15 ½ acres all of which is owned by the applicant.

This farmland will be used to rear sheep.

Animals kept at the site
The applicant does not currently have any livestock on the holding as he has nowhere to house them or to keep the fodder and implements.

The applicant I looking to purchase between 30 and 35 sheep for the land.

Existing buildings on the holding
There are currently no buildings on this holding suitable for use.

Additional rented buildings/land
The applicant does not rent any additional land or buildings.

Proposed size of building
The applicant wishes to erect a steel framed agricultural building 24.384m long x 18.288m wide x 4.267m high to eaves level.

The floor area created by this development will be 445.93m².

Proposed use of building
This land has been newly purchased by the applicant and has one small derelict building on it that requires demolition as it is beyond economical repair.

This parcel of land currently has one small building on that is not fit for purpose. This building is required to house, feed and lamb sheep and to store the fodder and implements required to run the holding.

There are no other buildings on site to house the stock levels and to store the fodder and implements required to manage the holding. The applicant is fully aware of the inadequate housing and storage facilities available.

This building will accommodate the required stocking densities and storage space and ensure good farm/stock management with easily maintained clean and hygienic conditions. This building will ensure a good strong future for his business.

Shelter should be provided for sheep especially in cold, wet, windy weather, at lambing and after shearing. Very young lambs are particularly susceptible to hypothermia in cold wet weather.

Defra regulations state that animals are not meant to poach the ground therefore housing for animals is essential.

FABBL requirements state that the space allowance for loose-housed sheep on a solid floor during pregnancy is a minimum of 1.2m² - 1.4m² and 2.0m² - 2.2m² after lambing with lambs at foot up to six weeks of age.

Deep litter bedding will be used on the solid floor; this bedding will then be spread back on the applicants land.

Where possible, pregnant ewes should be kept in groups of less than 50 to allow for better individual recognition and attention at lambing time.

This building will also be used to store bales of hay and straw. By enabling these bales to be stored in the building it will reduce the use of plastics therefore creating a more environmentally friendly holding.

In addition to the above this building will also be used to store implements. These implements are currently left outside exposed to the elements. This building will also enable the applicant to have shelter to mend any broken down implements. Implements to be stored include tractors, trailers and general agricultural equipment required to run the holding. This building will enable the equipment to be kept out of view and restricts the chances of the implements being stolen.

Employment at the site
The applicant will run the holding himself and will not employ anyone on the holding.

Landscaping Details
The applicant is happy to carry out any landscaping scheme specified by yourselves in order to protect the amenities of the site and the area.

Any trees planted will be fenced from livestock and will be protected by either spiral-type rabbit guards with canes or Netlon mesh-type guards including canes.

A circle of 1 metre around the base of each tree shall be kept weed free for a period of at least 2 years.

Any trees that die, become seriously damaged or diseased will be replaced by trees of similar size, unless there is reason to believe that the original species chosen was unsuitable for the site, in which case an alternative appropriate species will be used.

All planting would be carried out in the first planting season following the construction of the building.

Trees will be provided in accordance with BS 3936 and planting to be in accordance with BS 4428.
