Submission: Objection
Comments: The Parish Council wish to OBJECT to this application.

In recent history the applicant had permission to convert agricultural buildings to residential therefore he set precedent of not requiring agricultural buildings therefore it puts into question as to why he needs them now.

Building A - comments covered above.

Building B and its proposed new access track - new access track would be onto narrow lane and no appropriate. There are no buildings in the vicinity part form a couple of stables a few fields away, a building of this size would be inappropriate in open countryside.
