Hedging Collections from Buckingham Nurseries

We are offering this collection of native trees either to plant in existing hedges, to intersperse in new hedges, or to plant in mixed copses. Native trees, especially Oak, can make a valuable contribution to wildlife habitat and some will have an economic value as a source of home grown hardwood.

The basic collection of five trees will be the varieties **Common Alder** (4-5ft/120-150cm), **Bird Cherry** (4-5ft/120-150cm), **English Oak** (4-5ft/120-150cm), **Mountain Ash** (4-5ft/120-150cm) and **Field Maple**. For orders of 5 or more collections, we shall increase the number of varieties in the collection of 5 trees to include **Small-leaved Lime** (4-5ft/120-150cm) and **Wild Cherry** (4-5ft/120-150cm).

Occasionally we may substitute other varieties of native trees. If a customer specifies we can include any native poplars or willows, or the Wild Cherry can be substituted into the basic collection.

	Price per collection for 1+	5+	50+		
Without tree shelters	£11.75	£9.85	POA	0	Buy
With 1.2m (4ft) tree shelters	£23.75	£21.85	POA	0	Buy

OR

Bare Rooted Seedlings: About half the mixture will be 2-3ft (60-90cm) seedling **Quickthorn** and the balance selected from 2-3ft (60-90cm) seedling **Blackthorn**, **Field Maple** and **Spindle**, and 16-24ins (40-60cm) **Dog Rose**, **Dogwood**, **Guelder Rose**, **Hazel** and **Sweet Briar Rose**. Occasionally, we may substitute 2-3ft (60-90cm), **Alder Buckthorn**, **Alder Common**,and 1.5-2ft (45-60cm) **Wayfaring Tree**, or other native hedging plants.

Bare Rooted Transplants (click here for more details): the mixture will be from the following 2-3ft transplants: **Quickthorn**, **Alder Buckthorn**, **Blackthorn**, **Dog Rose**, **Dogwood**, **Field Maple**, **Hazel**, **Spindle** and **Sweet Briar Rose**. Occasionally we may substitute **Alder Common**, **Sea Buckthorn**, **Wild Privet** or other native hedging plants.

Cell Grown Plants (click here for more details), ideal for planting from April to October when bare rooted plants can't be planted. Available in packs of 10, each pack containing 5 **Quickthorn**, 1 **Blackthorn**, 1 **Dog Rose**, 1 **Field Maple**, 1 **Dogwood** and 1 **Hazel**.

For every 10 yard length of hedge we recommend 25 plants (10 metres = 27 plants), giving an average planting distance of 14ins (35cm) between plants, but be guided by the planting distances listed for individual varieties.

For a denser or stock-proof hedge we recommend a double row planted 20ins (50cm) apart, 15ins (38cm) between rows, that is 36 plants for a 10 yard length (40 plants for a 10 metre length)

Minimum order for Mixed Native Hedging:
10 plants (bare rooted plants)
or 1 pack of 10 (cell grown plants)

	Price per plant for 10+	50+	250+	1000+	How Many?
