To replace slate grey colour tiled traditional roof with preferred more efficient, modern and maintenance free, slate grey composite roof, for the reasons stated below.

1/ **Being on a hill, Rue Hill Camp Site is exposed to strong winds.**

2/ **Composite roof more suitable for high pitched roof. (no tiles to blow off in the wind)**

3/ **We are an environmental friendly site, Solar panels can be attached more securely and safely to a composite roof.**

4/ **The white smooth internal finish will enable us to maximise on natural day light.**

5/ **The flat internal finish makes an ideal hygienic, clean and modern alternative to a tiled roof, especially for a toilet and shower block.**

6/ **Panels fully fitted with closed cell foam, eliminating condensation and providing a consistent insulation performance over the building envelope.**

7/ **More energy efficient than tiled roof.**

8/ **Vandal proof.**

9/ **More fire resistant.**

10/ **Less maintenance.**

Thanking you for your consideration.
