#### PLANTING NOTES

- All planting and operations should comply with BS 4428 'General Landscape Operations'. All plants shall be supplied in accordance with the HTA National Plant Specification and their certified nurseries.
- Planting outside the usual October-March growing season shall be pursued by approval only. If agreed all bare root plants shall be substituted with container grown stock.
- Topsoil depths to shrub/grass areas should not exceed 300mm.Suitable (loosened) subsoil should provide the remainder of the minimum rooting depths. The minimum rooting depths should be as follows:
  - 450mm for grass (150mm of topsoil)
  - 600mm for shrubs and native hedgerows (300mm of topsoil)
- Trees within hardstanding or highways visibility splays shall be clear stem to 2m high unless specified otherwise. Trees adjacent to buildings and services shall include root barriers where necessary and should be planted in positions as indicated on the drawing.
- Specification of species, position and density shall be in accordance with drawing and planting schedule provided, and should not be amended without prior approval of the Landscape Architect. For detailed landscape specification information, please refer to the relevant documentation.
- All foundation designs provided by the architect/engineer must take into account the effect of existing trees, and the proposed landscape scheme, and any conflicts made known to the Landscape Architect For necessary changes. Given proximity to buildings all trees should incorporate root barriers.
- The contractor is responsible for checking locations of all existing and proposed services, and shall advise the Landscape Architect if there are any conflicts.
- All existing trees and hedges shall be protected in accordance with BS5837 For the duration of the construction period.
- Management operations for the site shall be carried out in accordance with the agreed 'Landscape Management Plan'.
