Submission: Objection
Comments: Plot 23 which is type reference G is too close to my rear garden and will completely block all light into the garden. I don't understand why this can not be moved back. There is no location within the entire estate that has houses built with such close proximity onto the back garden. Can you please revisit this particular aspect of the plan as will impact on my back garden where my children and ultimately the value of my property

I also object to further industrialisation of the area, the parking restrictions currently in place are not adhered to and in simple terms a joke. The garages and warehouses park where they want at the moment and no concern is given whatsoever to traffic. Further industrialisation will compound this problem
