DESIGN AND ACCESS STATEMENT
Re-submission Application - proposed ménage 40m x 20m

Design

I have considered steps of assessment, involvement, evaluation and design in relation to the physical characteristics of the proposed scheme.

Use
No newly constructed buildings are to be used.

The space to be used will be for the construction of the ménage which will then be used for personal equestrian recreational purposes. This is partially due to safety reasons. Traffic passing by along the nearby highways frequently travels at dangerously highs speeds. Use of a ménage will enable the exercising of the horses to be carried out in a safe manner.

The ménage would also be used as a turnout area for horses in order to manage and protect the existing grazing within the holding. The horses are already stabled in existing buildings.

Amount
No buildings will be built. The ménage will be enclosed with wooden post and rail fencing as detailed on the cross sectional diagram submitted.

An existing outbuilding as indicated on the plan will be utilised to house equestrian jumps and poles etc when not in use.

Layout
There are no building to be erected and the space utilised will be private space immediately abutted and surrounded by further private space.

Scale
As indicated on the planning application, the dimension of the ménage will be 40m x 20m. No buildings are to be erected.

Landscaping
The ménage will be situated within an existing relatively flat field which drains away towards its southern boundary. The westerly edge of the proposed ménage would be screened by an existing hawthorn hedge and trees.

The proposed landscaping scheme (as further noted on the attached plan) is as follows:-

- Hedgerow planting to bolster existing gaps in the hedge by planting, for example, species such as hawthorn or holly at a height of 60cm in double staggered rows at intervals of 0.5m at say 5 plants per metre run.

- Planting of trees (species such as Alder, Rowan or Downy Birch) where trees are sparse towards the southern end of the westerly boundary. The trees would be planted at a similar height to the hedgerow (ie 60cm) to avoid risk of failure. The trees would then grow above hedge height.

- In order to avoid damage to the roots of the existing trees lying along the westerly boundary of the proposed ménage, the boundary to the ménage along the westerly boundary would run no less then 2m distance from the trunk of those existing trees.

- There is an existing hawthorn hedge approximately 3m in height which would screen the eastern boundary of the proposed ménage for approximately three-quarters of its length. The approximate position of this hedge is shown on the attached plan.

The existing muck heap would be moved to the enclosed area as indicated on the attached plan.

Appearance

No buildings are to be erected and the ménage will look like a conventional 40m x 25m equestrian arena bordered by wooden post and rail fencing and wooden gate to access it. The proposed surface is either flat rubber or tyre rubber in order that it will impact as little as possible on the visual amenity of the site.

Access

Access to the ménage will be from its northern end via an existing yard entrance. The yard abuts the public highway which has its existing entrance.

No new access on to the public highway is required. Issues of public transport, road layout etc are therefore considered not applicable.

In relation to age, disability, ethnicity or social grouping everyone wishing to use the ménage for equestrian purposes will be able to do so on equal terms but in any event the ménage will not be used for public purposes – only private use.
