Strongly object. On grounds of increased vehicle footfall, which could lead to our animal fatalities (sheep stock). Our stock is kept on an adjoining acres ¿we own¿ where the applicants want to make an entrance; in addition this is on a brow of a hill l with poor visibility. To confirm our stock is regularly moved via the proposed entrance and also on the junction below (cross roads). This will increase risk for our stock, and families safety whilst moving our animals. In addition we¿ve children and there is a number of children in our village, with the increase of vehicles, we fear with speed limits as they are & increased road use accidents may occur in our village.
