Comments: with regards to planning application SMD/2016/0812. I have concerns over the noise that will be made by the log cutting and splitting which will be done in the proposed agricultural building. I would request that it may be appropriate if the applicant can clad the building to sound proof the noise level, and also restrict the times when cutting and splitting are undertaken. The posistion of the proposed building being on the hill will allow the sawing to be heard from the surrounding area. I would also like to see tree and hedge planting on all elevations.
