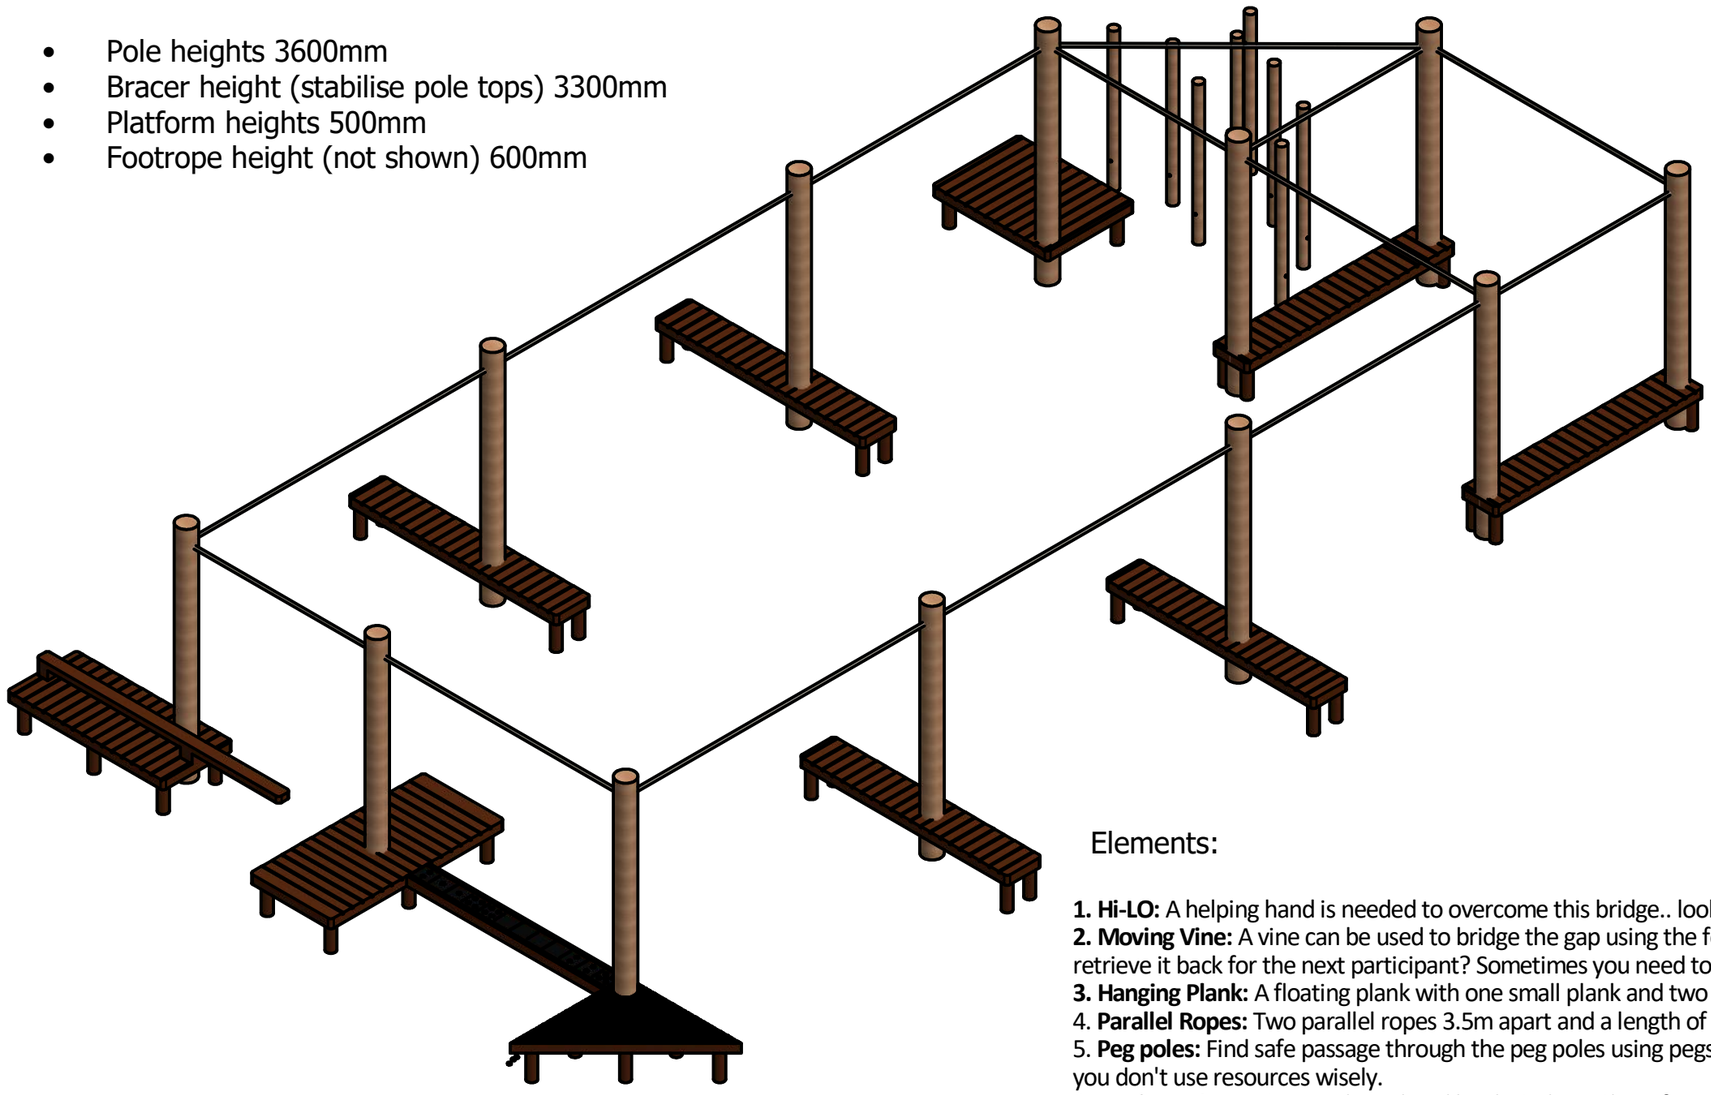
Low Level Challenge Course: 1:75 3D Structural View

- Pole heights 3600mm
- Bracer height (stabilise pole tops) 3300mm
- Platform heights 500mm
- Footrope height (not shown) 600mm



Elements:

1. Hi-LO: A helping hand is needed to overcome this bridge.. look to see how you can help?
2. Moving Vine: A vine can be used to bridge the gap using the footrope.. but how do you retrieve it back for the next participant? Sometimes you need to go out of your way for others..
3. Hanging Plank: A floating plank with one small plank and two gaps.. plan your next move carefully.
4. **Parallel Ropes:** Two parallel ropes 3.5m apart and a length of rope.. balance or brains to get across?
5. **Peg poles:** Find safe passage through the peg poles using pegs for feet... It could be a stretch if you don't use resources wisely.
6. **Hook on vines:** Vines and overhead hooks to hang them from... what are the different skills and abilities in your team?
7. Laser Field: Overcome the laser field with good communication and concentration.
8. **Cantilever:** Can you walk the plank? Trust in team mates is needed... But wait what about the last person?
9. :Jigsaw: Can you solve the jigsaw to cross this bridge... being able to see the big picture
10. **Broken Indiana Bridge:** The rungs have fallen into the abyss.. how to cross?
