I wish to object to the above planning application
I feel a further 15 caravans to make in total 20 on the site will have a detrimental visual impact on the entrance and exit to our small village and to the local residents. I feel that a willow hedge will do little to improve this
I am aware that Mr Chadwick has this year considerably extended his toilet block and so as he says in the statement a further block will not now be necessary as it has already been built.
I do how ever have no objection the the further 15 caravans being sited in the field below the existing cl site They would be far less visible from the main road and have less impact
