Comments: Britannia Works west street ,has 2 separate owners .the area which is owned by myself has multiple floors and is attached on multiple floors to building application number smd/2017/0291 ,for over 100 years industrial manufacturing machinery has been used on all of the floors .This means subject to approval there will be residential usage attached directly to existing commercial usage over multiple floors .therefore a scheme / condition needs to be put in place whereby the existing over 100 years commercial usage is not affected or impacted by the new proposed residential usage . By this I refer to noise and vibration etc associated with manufacturing / restoration work which it is presently used for
