Dear sir/madam

Planning ref SMD/2020/0415

I wish to object to the application for a hand car was at Kingsley Moor service station, firstly a hand car wash assumes washing by hand whereas in face it is a jet wash which means we have a constant high pressure water against the metal body of a vehicle.

The corner of our house is approximately 4 to 5 meters away from the proposed jet wash facility, previous issues we had with is listed below

- High levels of noise
- Car engines
- Engine pollution from stationary vehicles
- Shouting by operators
- Spray on our windows

A fence was erected last year which had little effect on the noise and no effect on the other issues raised above. We could not have our windows open on that side of the house during operation hours, I have the right to a live in my own home without the persistent noise and other issues this has and will inflict on my family.

I would ask that you consider the position of the jet wash and my home being so close (5 meters) and put yourself in my position having to live next to what will cause considerable stress to my family, I refer to the noise as white noise that use in the army to interrogate prisoners. .

Best regards

Dean Platt
