Subject: SMD 2020/0625 - Objection

As my property looks directly on to the proposed development and this is a green belt area, a metal building of this sort is an eyesore like those at the former Lancaster premises. As the land it is proposed to go on is a local landmark, i.e. The Troughstones, an area of natural beauty in Biddulph Park and well walked it would be detrimental to the area. The view from my property will be greatly affected by the erection of such a building and will impact negatively on the value of my property. Wouldn't a single storey non permanent wooden stable block be more in keeping with the locality? Please could you keep me informed of developments and if there are any meetings I could attend.

My property will be the one most affected by this application. Is it possible to email me a copy of the application as your website does not appear to be working properly so I can actually see what is proposed?
