Dear Sir, Madam,
Regarding the Summer House planning application that next door have applied for.
This is a follow on to our last email regarding the concerns we have about the building that we forgot to mention in our last mail.
We only have two bedrooms and they both are facing the rear of the property. Having overheard mr Trumble speaking to electricians about having three spotlights on the outside of his building and several inside then it concerned us greatly.
These would light up the back of our house meaning even less privacy and would light up our bedrooms making sleep difficult. Mr Trumble already has a massive raised fire pit which when alight lights our bedrooms up with the flickering flames.
Mr Trumble enjoys his party's and we fear this summer house will just become a party house.
We both feel that it will be just an extension of their house and the description of a Summer house is the last thing it will become. It will be an all year round house and used as an all year round house.
I hope this gives a better understanding of our fears over this imposing building and why we are so against it.
Kind regards, Mr Brown
