Design & Access Statement

New Changings Rooms
at
Checkley Cricket Club, Uttoxeter Road
CHECKLEY ST10 4NA

The Club was formed in 1860, has played on this ground since 1919 and purchased the facility in 1954. Levelling was carried out in 1970 and a replacement Club House built in two phases in 1980 and 1984.

The Club Ground has been used for Minor and County cricket matches and is considered by the Establishment to be one of the best facilities in the area.

The Club achieved ECB Premier Accreditation in 2001 and have a very strong Junior as well as Senior and Women's Section. It now operates 10 Junior teams, some of which are mixed boys and girls team, 1 girls team, 5 senior teams and 2 women's teams.

Following relaxing of Covid restrictions play was resumed and temporary changing accommodation had to be established adjacent to the playing area because the existing changing rooms are not big enough to accommodate a safe social distancing. The Management committee now wish to replace these temporary facilities with a purpose built structure which will allow greater functioning space and create a separate changing area for women and girls.

This will also allow internal alterations to the existing Club House, especially in respect of disabled toilets.

The proposal is for a mono slope building facing the playing area which will include facilities in line with ECB requirements.

It is understood that the site is not subject to flooding and is not within a Flood Zone.

This development should have no detrimental effect on the people in the locality.
